

THERMAL IQ™
UNLEASH YOUR
THERMAL
PROCESS DATA

ACTIONABLE INTELLIGENCE FOR BETTER BUSINESS OUTCOMES

Consisting of wireless connectivity, a mobile application and an enterprise-view dashboard, the Thermal IQ platform securely connects combustion equipment to the cloud, making critical thermal process data that is normally trapped at the equipment level available anytime, anywhere, on any smart device or desktop.

With Thermal IQ data, users can **see what is happening with thermal processes without being at their facility, get real-time alerts** when key parameters are outside normal limits, **track historical data** over time to **identify when and why something happened**, and provide **actionable recommendations**.

Sign up for a free demo today! You will instantly get access to the Thermal IQ Optimize demo and will be able to see some of the key features our enterprise-level, desktop-based remote monitoring solution has to offer. In a matter of 72 hours you will also receive access to Thermal IQ Operate, our mobile application, for a 30 days trial.
